

CinemaForYou

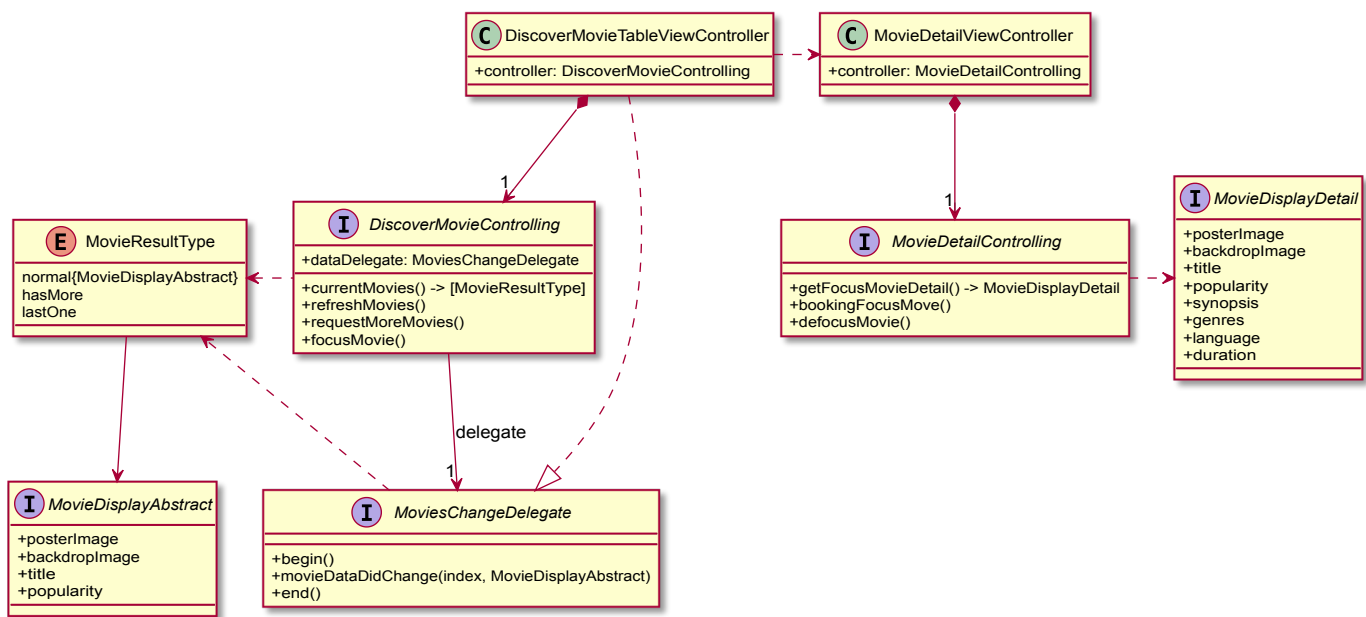

Class Diagram

View / ViewController

prepare two ViewController

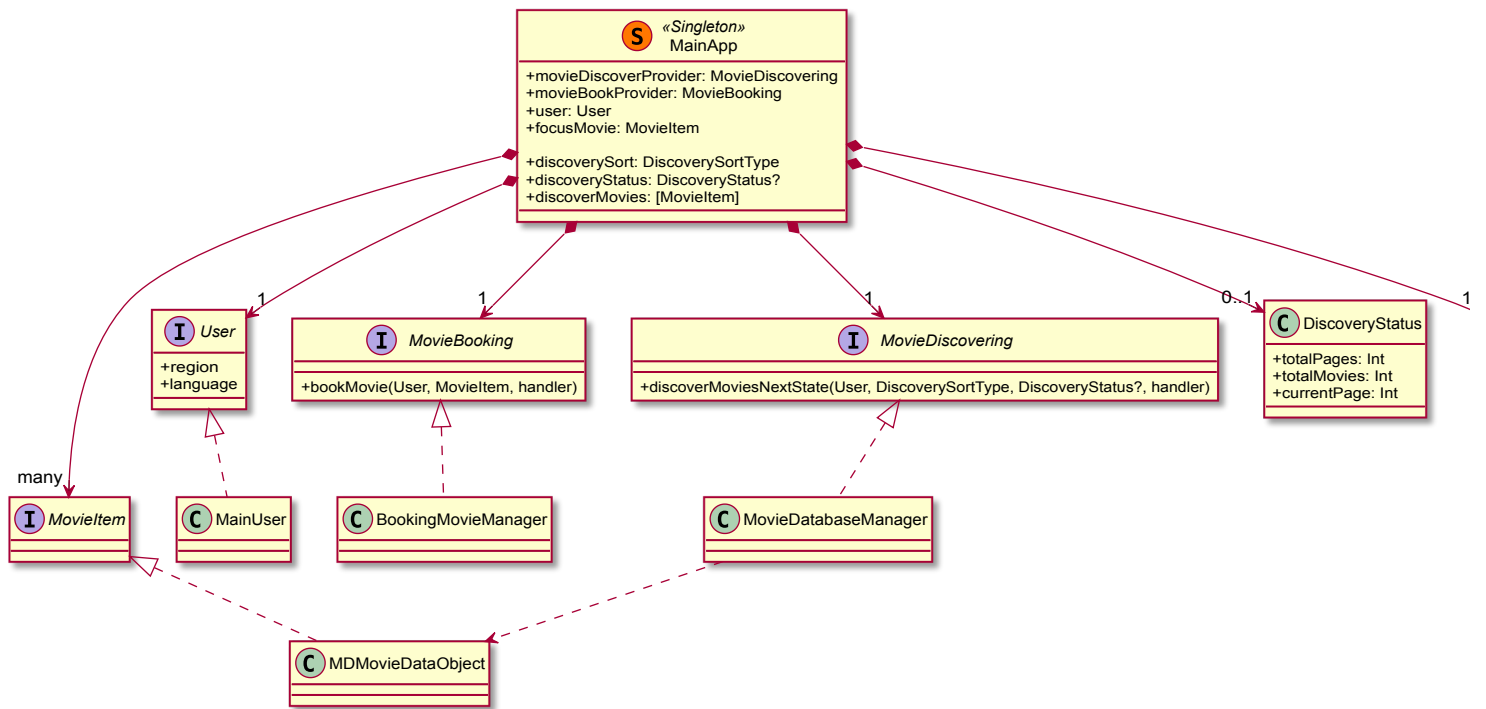

- 1. DiscoverMovieTableViewController
- 2. MovieDetailViewController

using interface to control the UI flow / Action

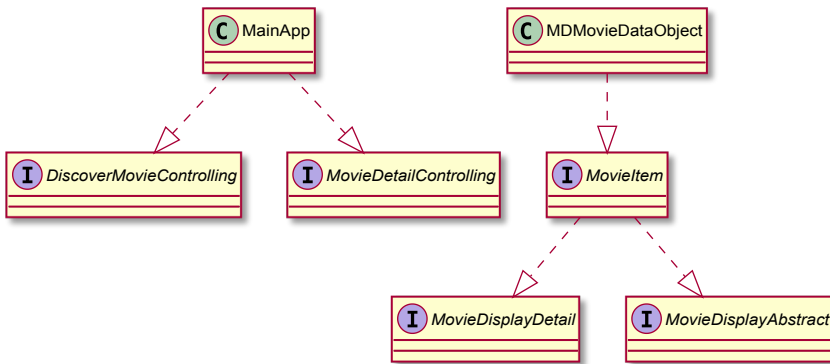

Business Rule

MainApp is the master of all. It owns the business rules. I design the necessary interfaces. During a business flow, if MainApp can't support. it will ask another manager or helper by interface.

the Relation of Interface Implementation

System Provider

in order to mock the system call in unit test, use system calls by SystemUtils interface
